Changing Equalized Values after August 15

The purpose of this document is to describe the sequence of events when deriving Equalized Values, how errors are discovered, and how corrections are made. Finally, the memo describes the challenges faced when considering a change to Equalized Value after August 15.

The 2011 Equalized Values were published on August 15 as required under sec. 70.57, Wis. Stats. Because of the number of uses of Equalized Values, these values are anticipated by local government officials, state agencies, lending institutions, and the public. The values are sent to every municipality and county and are posted to the Internet. They are also sent to the media and distributed via e-mail to county clerks and treasurers, real property listers, register of deeds, municipal clerks and treasurers, tax incremental financing subscribers, municipal assessors, and assessor subscribers.

If an error is discovered in an Equalized Value, sec. 70.57, Wis. Stats., identifies the process for correction. Specifically, the Department of Revenue (DOR) adjusts the value in the <u>subsequent</u> year: an error made in 2011 will be corrected in 2012.

For example, if the 2011 Equalized Value for a municipality was over-stated by \$1,000,000, DOR would reduce the 2012 Equalized Value by \$2,000,000 (in addition to any other changes). One-half of the total reduction (\$1 M) represents the amount necessary to correct the base value of the municipality for 2012. The other half (\$1M) represents a one-time compensation for the 2011 overstatement in Equalized Value and is not carried forward to 2013. In short, the municipality was apportioned property taxes that were based upon \$1,000,000 more in Equalized Value for 2011, which is compensated for by the reduction in 2012.

Some of the base figures that would be disrupted by changing the Equalized Values after August 15 include the 2011 County Apportionment, the 2011 Net New Construction (Levy Limit) calculations, and the 2011 Tax Incremental Districts (TID) values. For example, certified TID values have been sent to municipalities, counties, school districts, technical colleges, and special districts and the 12% TID value limitation has been determined and posted to the Internet.

After publication of the 2011 Equalized Values on August 15, the following processes began:

- DOR has begun calculating the 2011 School District Values that have a statutory publication date of October 1. Any change to a 2011 Equalized Value at this date would likely result in a late publication which would negatively impact the budgeting process of all school districts.
- DOR will produce 2011 assessment compliance information that includes statutory notices to municipalities on November 1. Changing the 2011 Equalized Value at this date may result in our inability to generate compliance information and notices on time.
- DOR has published 2011 Certificates of Equalized Values where municipalities and counties have used the August 15, 2011 values. This is done for such things as the issuance of bonds. Changes to the values after August 15 could impact these previously approved financial transactions with a cascading effect amongst users.
- DOR has calculated the statewide reduction to shared revenue payments to municipalities in 2012 at \$47,663,400. One of the factors in calculating the reduction is the Equalized Value of each town, village and city throughout the State. The original estimates of 2012 shared revenue must be issued on September 15, 2011 according to statute. If there was a

subsequent change to the Equalized Value of a municipality after August 15, the shared revenue payments for the entire state will have to be recalculated. Re-calculating the shared revenue payments could result in a change to the payment to most municipalities as the total dollar amount of the reduction remains the same. Note that the reason for the recalculation is because a factor in calculating the *reduction* to shared revenue is Equalized Value. (The last time there was a reduction was in 2009.)

From a technical perspective, it would be both challenging and costly to reprogram DOR's computer system to generate new values for 2011 after August 15. The system was designed to close out the valuation year after August 15 and begin a new year. We estimate that it would take approximately one month to update the system to recompute the 2011 Equalized Values, including reprogramming, testing, creating reports, and re-notification to all taxation districts in the State. This would cause a significant delay to the budgeting process for School Districts, Technical College Districts, and Special Districts. In the worst case scenario, it is possible that the 2011 property tax bills would not be available until after January 1, 2012.

In summary, it is possible to recalculate the 2011 Equalized Values. However, the results will be problematic, complex, and likely detrimental to every Taxation District in the state.

EQUALIZED VALUE - TIMELINE

August:

- DOR publishes the certified Equalized Values for municipalities and counties. DOR also publishes Net New Construction Values and County Apportionment Values.
 - DOR commences distribution of Equalized Value Certificates.
 - DOR commences development of School District Equalized Values.
 - DOR commences development of Technical College Equalized Values.
 - DOR commences development of Special District Equalized Values.
 - DOR commences development of the agricultural use-values.
 - DOR commences development of the assessment compliance information, reports, and letters.
 - DOR provides the values to DOA, DNR, and DOT.
- DOR finalizes the exempt computer values that determine computer aid payments.

September:

- DOR certifies the Equalized Value for each Tax Incremental Finance District under sec. 66.1105(5)(g), Wis. Stats.
- DOR finalizes School District Equalized Values.
- DOR finalizes Technical College Equalized Values and publishes the values.
- o DOR finalizes Special District Equalized Values and publishes the values.
- o DOR notifies taxation districts of estimated shared revenues and payments under the expenditure restraint program.
- o DOR distributes levy limit worksheets to taxation districts.

October:

- DOR certifies the School District Equalized Values to the Department of Public Instruction.
- DOR certifies the Technical College Equalized Values.
- o DOR certifies the Special District Equalized Values (Sanitary Districts, Public Inland Lake Protection Districts, Rehabilitation Districts, and Metropolitan Sewerage Districts)
- DOR distributes assessment compliance letters under sec. 70.05. Wis. Stats.
- o DOR distributes exempt computer value notices that determine computer aid payments.

- o DOR publishes ratio reports, statistical reports of property value as specified under sections 70.345, 73.03(19), 73.06(5), Wis. Stats.
- DOR publishes Tax Increment Worksheets for completion by municipalities.
- Appeals of an Equalized Value are due by October 15 under sec. 70.64, Wis. Stats.

November:

- Statutory date for school districts to certify a levy.
- The Department of Public Instruction provides DOR with School District Tax Apportionments.
- o Technical Colleges and Special Districts provide DOR with Tax Apportionments.
- Shared revenue payment notices are distributed to taxation districts.
- Municipal Clerks list all certified levies on mill rate worksheet.
- o Municipal Clerks complete the Tax Increment Worksheets.
- DOR calculates the Lottery & Gaming Credit and the First Dollar Credit.
- o DOR distributes School Levy Credit amounts to municipalities.

December

- DOR distributes the Statement of Taxes to municipalities.
- Taxation Districts distribute property tax bills to property owners by the third Monday in December.
- o Property owners commence payment of property tax bills.

DOR Equalization Improvement Initiatives October 14, 2011

Background.

The assessment process in Wisconsin consists of the Department of Revenue (DOR) assessing manufacturing property and each individual municipality employing its own assessor and completing its own assessment of all other property. Wisconsin is home to 1,851 municipalities, and they all have public assessment records relating to the property and land in their communities.

Each municipal assessor submits assessment data to DOR each year. DOR uses the data submitted by each of the state's 1,851 municipalities to develop equalized values. On August 15 each year, DOR is required by state statutes to publish equalized values for every municipality in the state.

Historically, this process was based on paper submissions from municipalities followed by DOR performing data entry of that information. Since this process was not automated, several individuals at both the municipal and DOR levels were involved in gathering, reporting, and entering this data. This presented multiple opportunities for human error. Also, the lack of automation increased the time necessary for DOR to compute equalized values, which prevented DOR from having preliminary values available to municipalities prior to the final published values on August 15 each year.

Innovation and Improvements.

Improving the equalization process is a continual goal for DOR. Accurate, fair, and transparent equalization benefits taxpayers, local governments, and the state. In response to the goal for ongoing improvement, our agency is pursuing three initiatives that will: 1) utilize new technology; 2) create higher standards in the field; and 3) increase the availability and transparency of data used in the equalization process.

IPAS

The Integrated Property Assessment System (IPAS) is a new computer system used by DOR that modernizes the equalization process and consolidates several outdated mainframe systems previously used by DOR. Starting in 2012, local municipal assessors will now be able to directly submit assessment data into IPAS, which will reduce human error associated with the eliminated steps involved with data submission and data entry across the multiple mainframe systems used in the past. DOR will then review this electronically submitted data and communicate errors, discrepancies, and other concerns to local assessors more quickly. IPAS provides DOR's equalization process the opportunities for efficiency and accuracy similar to the revolutionary improvements associated with electronic filing of income tax returns. Additional benefits of IPAS follow.

- Starting in 2012, fields will be pre-populated for municipal assessors with the previous year's data. When entering the new data, this will immediately notify an assessor of a significant discrepancy that may indicate an error. This will allow for a correction from the local assessor prior to the incorrect data ever reaching DOR.
- IPAS will enable DOR to prepare preliminary equalized values for municipalities approximately two weeks before the August 15 deadline.

- These two additional weeks will allow for both DOR and local assessors to review the preliminary data and correct errors before the values are published and finalized on August 15.
- Since assessors will be directly submitting data to DOR, if questions or concerns arise, both DOR and local assessors will review the same available data to work toward a solution and avoid the trouble of reviewing data that was previously dispersed among several mainframe systems.

USPAP

The Uniform Standards of Professional Appraisal Practice (USPAP) is an internationally-recognized system that establishes a reporting process through which municipal assessors document and explain the work completed for a particular assessment year. Beginning in 2013, DOR will provide a standard USPAP report template for assessors to use statewide. This template will outline the analyses, opinions, and conclusions that the assessor reached during the assessment process. The municipal assessor will present this report at the local Board of Review. Using a standardized and professionally regarded report will improve the transparency, consistency, and fairness of the local assessment process. Taxpayers, municipal officials, and DOR will better understand each local assessor's methodology when reviewing the USPAP report, and because of the standardized template, interested parties will have a basis for comparison of their municipality's report and others in the state.

Electronic Assessment Data

Similar to IPAS, electronically stored assessment data allows for better record availability, more efficient data management, and accurate property valuation. Beginning in 2013, DOR will require municipalities to store their assessment data in an electronic format.

Conclusion.

IPAS, USPAP, and electronic assessment data will allow local municipalities and DOR to make significant strides toward improving the equalization process and reducing the potential for human error. These innovation and improvement initiatives will also provide increased opportunities to correct errors prior to the equalization values' final publication.

The rollout of IPAS is ongoing, and the critical improvements described above will be ready during next year's equalization process.

Many municipal assessors already follow USPAP standards and maintain files electronically. Municipalities already employing these methods will see little or no need to change to comply with these new requirements. DOR is sensitive to other municipalities' concerns about having adequate time to make the changes needed to comply. For that reason, DOR moved the date for compliance with USPAP and electronic assessment records from an earlier deadline to 2013. DOR will continue to work with municipalities over the next several months to ensure a smooth transition.

Changing Equalized Values after August 15

The purpose of this document is to describe the sequence of events when deriving Equalized Values, how errors are discovered, and how corrections are made. Finally, the memo describes the challenges faced when considering a change to Equalized Value after August 15.

The 2011 Equalized Values were published on August 15 as required under sec. 70.57, Wis. Stats. Because of the number of uses of Equalized Values, these values are anticipated by local government officials, state agencies, lending institutions, and the public. The values are sent to every municipality and county and are posted to the Internet. They are also sent to the media and distributed via e-mail to county clerks and treasurers, real property listers, register of deeds, municipal clerks and treasurers, tax incremental financing subscribers, municipal assessors, and assessor subscribers.

If an error is discovered in an Equalized Value, sec. 70.57, Wis. Stats., identifies the process for correction. Specifically, the Department of Revenue (DOR) adjusts the value in the <u>subsequent</u> year: an error made in 2011 will be corrected in 2012.

For example, if the 2011 Equalized Value for a municipality was over-stated by \$1,000,000, DOR would reduce the 2012 Equalized Value by \$2,000,000 (in addition to any other changes). One-half of the total reduction (\$1 M) represents the amount necessary to correct the base value of the municipality for 2012. The other half (\$1M) represents a one-time compensation for the 2011 overstatement in Equalized Value and is not carried forward to 2013. In short, the municipality was apportioned property taxes that were based upon \$1,000,000 more in Equalized Value for 2011, which is compensated for by the reduction in 2012.

Some of the base figures that would be disrupted by changing the Equalized Values after August 15 include the 2011 County Apportionment, the 2011 Net New Construction (Levy Limit) calculations, and the 2011 Tax Incremental Districts (TID) values. For example, certified TID values have been sent to municipalities, counties, school districts, technical colleges, and special districts and the 12% TID value limitation has been determined and posted to the Internet.

After publication of the 2011 Equalized Values on August 15, the following processes began:

- DOR has begun calculating the 2011 School District Values that have a statutory publication date of October 1. Any change to a 2011 Equalized Value at this date would likely result in a late publication which would negatively impact the budgeting process of all school districts.
- DOR will produce 2011 assessment compliance information that includes statutory notices to municipalities on November 1. Changing the 2011 Equalized Value at this date may result in our inability to generate compliance information and notices on time.
- DOR has published 2011 Certificates of Equalized Values where municipalities and counties
 have used the August 15, 2011 values. This is done for such things as the issuance of
 bonds. Changes to the values after August 15 could impact these previously approved
 financial transactions with a cascading effect amongst users.
- DOR has calculated the statewide reduction to shared revenue payments to municipalities in 2012 at \$47,663,400. One of the factors in calculating the reduction is the Equalized Value of each town, village and city throughout the State. The original estimates of 2012 shared revenue must be issued on September 15, 2011 according to statute. If there was a

subsequent change to the Equalized Value of a municipality after August 15, the shared revenue payments for the entire state will have to be recalculated. Re-calculating the shared revenue payments could result in a change to the payment to most municipalities as the total dollar amount of the reduction remains the same. Note that the reason for the recalculation is because a factor in calculating the *reduction* to shared revenue is Equalized Value. (The last time there was a reduction was in 2009.)

From a technical perspective, it would be both challenging and costly to reprogram DOR's computer system to generate new values for 2011 after August 15. The system was designed to close out the valuation year after August 15 and begin a new year. We estimate that it would take approximately one month to update the system to recompute the 2011 Equalized Values, including reprogramming, testing, creating reports, and re-notification to all taxation districts in the State. This would cause a significant delay to the budgeting process for School Districts, Technical College Districts, and Special Districts. In the worst case scenario, it is possible that the 2011 property tax bills would not be available until after January 1, 2012.

In summary, it is possible to recalculate the 2011 Equalized Values. However, the results will be problematic, complex, and likely detrimental to every Taxation District in the state.

EQUALIZED VALUE - TIMELINE

August:

- DOR publishes the certified Equalized Values for municipalities and counties. DOR also publishes Net New Construction Values and County Apportionment Values.
 - DOR commences distribution of Equalized Value Certificates.
 - DOR commences development of School District Equalized Values.
 - DOR commences development of Technical College Equalized Values.
 - DOR commences development of Special District Equalized Values.
 - DOR commences development of the agricultural use-values.
 - DOR commences development of the assessment compliance information, reports, and letters.
 - DOR provides the values to DOA, DNR, and DOT.
- o DOR finalizes the exempt computer values that determine computer aid payments.

September:

- DOR certifies the Equalized Value for each Tax Incremental Finance District under sec. 66.1105(5)(g), Wis. Stats.
- DOR finalizes School District Equalized Values.
- o DOR finalizes Technical College Equalized Values and publishes the values.
- DOR finalizes Special District Equalized Values and publishes the values.
- DOR notifies taxation districts of estimated shared revenues and payments under the expenditure restraint program.
- DOR distributes levy limit worksheets to taxation districts.

October:

- DOR certifies the School District Equalized Values to the Department of Public Instruction.
- DOR certifies the Technical College Equalized Values.
- DOR certifies the Special District Equalized Values (Sanitary Districts, Public Inland Lake Protection Districts, Rehabilitation Districts, and Metropolitan Sewerage Districts)
- o DOR distributes assessment compliance letters under sec. 70.05, Wis. Stats.
- DOR distributes exempt computer value notices that determine computer aid payments.

- DOR publishes ratio reports, statistical reports of property value as specified under sections 70.345, 73.03(19), 73.06(5), Wis. Stats.
- o DOR publishes Tax Increment Worksheets for completion by municipalities.
- o Appeals of an Equalized Value are due by October 15 under sec. 70.64, Wis. Stats.
- November:
 - Statutory date for school districts to certify a levy.
 - The Department of Public Instruction provides DOR with School District Tax Apportionments.
 - o Technical Colleges and Special Districts provide DOR with Tax Apportionments.
 - Shared revenue payment notices are distributed to taxation districts.
 - Municipal Clerks list all certified levies on mill rate worksheet.
 - o Municipal Clerks complete the Tax Increment Worksheets.
 - o DOR calculates the Lottery & Gaming Credit and the First Dollar Credit.
 - DOR distributes School Levy Credit amounts to municipalities.
- December
 - o DOR distributes the Statement of Taxes to municipalities.
 - Taxation Districts distribute property tax bills to property owners by the third Monday in December.
 - Property owners commence payment of property tax bills.
